

# Barco on Stage!

## Eurovision Song Contest 2005 [Kiev, Ukraine]

The 2005 Eurovision Song Contest, which took place in Kiev on Saturday, May 21st, showcased some of Barco's latest LED and projection technologies. From the brand-new OLite 510 display to the XLM H25 and SLM R12+ projectors, the spectacular stage design of the show attested to Barco's technology leadership in the international events industry.

When the lights went down and the stage lighted up for the final of this Song Contest, an estimated 400 million viewers world wide saw a spectacular stage featuring 86 tiles of Barco's brand new OLite 510 LED display technology.

With its 5000 Nit light output, 15 bit processing, IP65 rating and full TUV approval, the **OLite 510** brings an ultra bright indoor/outdoor LED display with all the benefits of SMD LED technology, such as wide viewing angles and short viewing distances, turning it into the ultimate product of choice for both Corporate and Entertainment Events applications. At the Eurovision Song Contest, Barco's OLite 510 was creatively integrated into the design of the stage floor and backdrop.

Next to Barco's OLite 510, also **280 ILite 8 LED tiles** were integrated in the impressive set design of the Eurovision Song Contest, alongside two Barco **XLM H25 projectors**, three Barco **ELM R18 projectors**, as well as two **SLM R12+** and three **SLM R10 projectors**. Barco rental partner, Massteknik, delivered all visualization equipment used on the show.

**BARCO**

Visibly yours
