

Outdoor LED Display Solution

Reliant Park Stadium [Houston, USA, 2002]

The Challenge

- To install over 500 square meters of ILiFE and DLiFE display at Reliant Park Stadium, the brand-new stadium that will host the 2004 Superbowl. The displays measure 250 square meters each and are located at both ends of the field.
- Four additional, smaller displays were also installed at various indoor locations throughout the complex.

The Barco Solution

- Guided by a dedicated project management team, Barco used a team of four engineers and highly trained technicians to install the various displays in less than 9 weeks.
- Leroy Shafer, Rodeo Houston, Assistant General Manager Marketing & Presentations, stated: "The entire Reliant Park is being designed and built to accommodate the latest in audio-visual technology. From the smallest to the most visible components, we are looking for quality, efficiency and reliability in every piece of equipment. We are extremely pleased to have Barco join us in this quest for excellence."
