**Barco Audio Technologies**

**IOSONO 3D sound for visitor attractions**

IOSONO sound is an important addition to the visuals and guarantees a captivating visitor experience in all situations.

Glenn Smith, Managing Director Sky-Skan

Create compelling attractions with 3D sound

Barco’s IOSONO 3D sound creates vivid natural soundscapes for themed entertainment, events and cinemas. A precise location of sound effects in space and outstanding immersion let the listener dive into a multimedia experience - be it a theme park ride, a museum or a dome show. The hardware and software offered are perfect tools for creating compelling attractions that are both fun and engaging, making your visitors part of the story.

- Exceptional immersive listening experience
- Perfectly tailored to individual venues, demands and budget
- Support for planning, installation and maintenance

The IOSONO CORE processor is the heart of IOSONO 3D sound systems. It is the ideal choice for the creation of immersive soundscapes for cinemas, events and themed entertainment. It comes with a variety of features ensuring an easy installation and adaptation to individual venues. The IOSONO CORE supports object based audio as well as all standard and future discrete multi-channel audio formats. The processor is a modular platform that boasts tailor-made solutions for a variety of applications. It renders up to 128 channels and integrates either MADI, AES I/O or both.

Perfectly tailored to your venue

The IOSONO CORE audio processor comes with standard audio interfaces, a remote control software and synchronization with other media, guaranteeing a smooth integration into show control systems. IOSONO sound systems are scalable, adapting to your preferences and the characteristics of your venue. By supporting a flexible number of loudspeakers as well as 2D and 3D setups, the systems will fit in perfectly.

Easy content creation

Thanks to object based mixing, the need for creation of dedicated mixes for different venues and room configurations belongs to the past. With the Spatial Audio Workstation plug-in, immersive soundscapes can be created easily and precisely. The VST plug-in supports up to 128 audio channels.

Services and support

The Barco Audio Technologies team supports customers with consulting and commissioning services for IOSONO sound systems. Additional services include product maintenance and support, as well as staff training, making sure clients benefit from the team's extensive experience in the design of 3D sound systems and their implementation into multimedia installations.

Versatile use cases - from Disney Parks to World Expo

3D sound can turn many attractions into a compelling experience. References include full dome shows for planetaria and World Expo pavilions and Disney World Orlando’s Haunted Mansion. IOSONO 3D sound systems are also used in 4D movie theatres, museums, corporate and music events and many more.
