

# E2 Jr

## Cost-effective Event Master processor

- Easy and reliable show setup and production
- Market-valued 4K performance
- Future-proof upgradability to the full E2 system

Bringing the same performance and features as the E2, the E2 Jr model is ideally suited for applications that do not require the full capacity of the E2. Offering 16 inputs, 8 outputs, and 8 mixers (or 16 single layers), the E2 Jr features the same 4 RU form factor as its bigger E2 brother.

### Easy upgrading

Thanks to its modular design E2 grows with your shows so you can easily upgrade the E2 Jr to a fully loaded E2 system at any time. You can simply purchase and install additional cards into your system. This modularity also ensures great serviceability, as users can easily swap a specific input or output card in the case of damage, without needing to ship or replace the entire box.

### Designed for life on the road

Designed for the live event industry, the rugged E2 Jr features a steel chassis that's able to withstand the challenging conditions of life on the road. What's more, it offers screen control in a compact form factor of only four rack units, which makes it easy to ship and install. And thanks to its modular cards and dual redundant power supplies, the E2 Jr is extremely reliable and easy to service in the field.
