

Project Management for control rooms

Your single point of contact accountable for your project's success

Visualization projects are always complex. They are subject to strict deadlines, sometimes need to be conducted during running operations, and often rely on different stakeholders that need to work together. Planning is therefore crucial.

Barco can provide a dedicated project manager to give you one single point of contact accountable for the project's lifecycle success. He or she ensures that the proper solutions are implemented to address your business objectives, and coordinates all efforts to meet your needs and schedules, to ensure low-risk deployments.

We solve:

- Costly deployment delays
- Unclear scope of work for the different suppliers involved in the project
- Unclear roles and responsibilities during project execution
- Unexpected risks during the project's lifecycle

Our deliverables

Depending on your needs, our project managers can deliver:

- Requirements review/validation
- Project Management Plan
 - Statement of work (Scope)
 - Project Schedule
 - Communication plan with clear roles and responsibilities
 - Risks analysis
- Pre-installation assessment/ Pre-installation requirements input

- Site installation coordination
- Follow up and status reporting

Project deployment team:

- 30+ seasoned Project Managers, delivering 700+ projects per year
- Global presence to serve the customer in his own language, and according to local regulations
- Guaranteed project quality through proven methodology based on PMI standards

Customer references:

"We are highly satisfied with Barco's service and implementation," Mardikar concluded. "It was a huge cross-functional effort which cut across technology, infrastructure and real estate experts. There were multiple milestones along the way such as testing, in order to create a multi-user, realistic experience. Thanks to Barco, Airtel's experience center is a world-first: a one-of-a-kind telecom service provider control room!"

Shyam Mardikar, Chief Strategy, and Architecture & Engineering at Bharti Airtel, India

"The reasons to opt for Barco include the technical qualities of the video wall as well as the local support offered by the Barco Brazil team."

Ricardo Casagrande, System Manager, Arteris, Brasil

"Barco was the only one who could provide us a full integration, delivering both their soft- and hardware. The in-depth preparation by our expert teams and Barco went very smoothly. It allowed us to decrease the implementation time, with minimal disruption to the existing installation."

Gorik Everaet, Incident Manager at Belgacom, Belgium
