Creativity is one of the core assets of your organization. With ClickShare, you can make sure ideas receive the attention they deserve. This wireless presentation system allows users to simply share what’s on their laptop or mobile device, on the presentation screen. No cables, no set-up, no waiting to join in.

Plug in to stand out
The CSE-200 offers the ClickShare experience for small and medium-sized meeting rooms. Anyone – including guests – can connect with one click and share right away, without the need for any training. Users simply plug a USB-powered device – the ClickShare Button – into their PC or Mac and click the button to get the content from their laptop on the large meeting room screen. With the ClickShare Apps, users can also share content from their laptops, mobile phones or tablets. Make sure to have firmware version 1.7 installed on your Base Unit to enable the best experience with the Desktop App.

Encouraging collaboration
The CSE-200 was designed for enterprise rollouts and offers enhanced security features, a wider range of connectivity options – including AirPlay and Google Cast support for non-HDCP content – Touch back function and central management. Allowing up to 2 persons to share content simultaneously, the CSE-200 ensures direct connectivity to the central screen and encourages collaboration. For user convenience, security features of the CSE-200 can be set to one of three predefined levels, depending on the company’s policies and needs. Last but not least, the device’s API also makes integration into the company network a lot easier. ClickShare also enables the touch back function in your meeting rooms. Run any application from your laptop and control it from the screen. With a few touches on the screen, open presentations, share mails, start a video. Focus on audience and content instead of on your presentation tool.

The CSE-200 is an ISO 27001 certified product.
