

TransForm N Management Server

Management Server running CMS

The TransForm N Management Server is the service node running CMS, Barco's control room management suite, delivering the core functionality of the networked visualization system. This software manages all hardware, and orchestrates the collaboration and visualization of the information shared between the different displays and operator workstations in a networked visualization system.

Features and benefits

- Manages input, output and service nodes
- Handles collaboration and sharing of information
- Runs the CMS software suite
