

SLite rental structure

Barco's SLite rental structure has been purpose built to facilitate the fast, easy build-up and break-down of an SLite LED display. With its light-weight, slim profile design and easy-to-use locking mechanisms, the SLite rental structure is ideal for use in rental & staging applications.

The SLite flightcase, which holds four SLite rental structures (with tiles) per case, is equipped with heavy-duty locks and ultra-hard wearing polyurethane castors to withstand the most demanding of rental environments. A specially designed trolley system also enables build up of the display directly from the flightcase.

PRODUCT SPECIFICATIONS**SLITE RENTAL STRUCTURE**

Width structure	896 mm
Height structure	672 mm
Depth structure	249 mm (S10) 255 mm (S14)
Width flightcase	1440 mm
